THE 17TH ANNUAL DAVID BERMAN MEMORIAL CONCURRENT DISORDERS CONFERENCE

WHO WAS DAVID BERMAN?

David Berman was a great friend and colleague to many mental health and alcohol and drug professionals.

Originally from the United States, he worked for 7 years at the Strathcona Mental Health Team as a community mental health worker. In 1989, he initiated the Dual Diagnosis Program and became its first director.

Sadly, on April 4, 1991 - one day before his 44th birthday - Dave passed away.

As a tribute to him, the David Berman Memorial Fund was established following his death. The aim was to host an educational event each year which would honour him by bringing together professionals sharing his commitment to bridging mental health and alcohol and drug systems. This annual conference is a tribute to his memory.

CONFERENCE VISION:

This conference aims to inspire and support individuals to work with people with concurrent disorders by providing evidence-supported skills and strategies, highlighting latest research and resources related to concurrent disorders, and promoting networking and the sharing of information and perspectives.

WHO SHOULD ATTEND?

This annual conference brings together an interdisciplinary group of professionals and individuals which includes: administrators/managers, alcohol and drug counsellors, community health workers, consumers, educators, families, law enforcement officers, mental health counsellors, nurses, peer-support workers, physicians, policy makers, psychiatrists, psychologists, researchers, social workers, students, and all who are interested in, or who work in, the field of mental health and addictions.

COMMITTEE MEMBERS:

Otto Lim (Conference Chair) Coordinator, Centre for Concurrent Disorders

Dammy Albach, Co-ordinator, Suicide Attempt Follow-up Education & Research (S.A.F.E.R)

Jack Beatty, Team Leader, Burnaby Centre for Mental Health & Addictions

Sally Blyle, Client Liaison, Centre for Concurrent Disorders

Daniel Buse, Clinician, Centre for Concurrent Disorders

Alice Chan, RN, MS(N), Clinical Nurse Specialist Mental Health, St. Paul's Hospital, Providence Health Care

Dana Clifford, Alcohol & Drug Counsellor, Sheway

Diane Dickson, Office Manager, Centre for Concurrent Disorders

Raymond LaPerrière, Clinician, Centre for Concurrent Disorders

Sara Lapsley, Client Liaison, Centre for Concurrent Disorders

Elaine Liau, Director, UBC, Interprofessional Continuing Education

Sean Murphy, Clinician, Centre for Concurrent Disorders

Nirmal Power, Clinician, Centre for Concurrent Disorders

Ron Prasad, Clinician, Centre for Concurrent Disorders

Lori Rock, Clinician, Centre for Concurrent Disorders

Debbie Suian, Therapist, TriCities Mental Health

Jennifer Toomey, Nurse Clinician, Provincial Youth Concurrent Disorders Program, BC Children's Hospital

Dale Wagner, Clinical Supervisor - Addictions, Pender Community Health Centre

COMMITTEE ADVISORY CONSULTANTS:

Dr. Laura Chapman, MD, FRCPC, Consultant Psychiatrist, Vancouver Island Health Authority

Dr. Garth McIver, Medical Manager, Adult Addiction Services

Dr. Tom Watterson, Strathcona Mental Health Team

Yes, You Can!
Overcoming Trauma and Addiction
With Love, Strength, and Power
A 16-Step Empowerment Approach
 Charlotte Sophia Kasl, Ph.D.

Charlotte Kasl's 16-Step empowerment model, based on love not fear, and taking action in our daily lives, is positive, holistic, and flexible. It honours cultural differences and provides invaluable support and information for people wanting to utilize an empowerment approach in groups and in their daily lives. Addiction and compulsions, and the associated depression and anxiety, often start as survival responses to underlying neglect, trauma, and alienation. The 16-steps address these core issues of helplessness, negative thinking, low self-esteem and fear, and have become a successful alternative to the widely used 12-steps of Alcoholics Anonymous.

Utilizing the 16-steps, we will address some of the well researched markers of overcoming addiction, trauma, and depression, including: developing a sense of mastery; attuning to one's authentic voice; creating warm supportive relationships; recognizing fight, flight, and freeze responses; soothing one's self; having fun; and accessing one's internal wisdom and courage. The model also addresses the needs of people to both feel emotions and contain them, and it helps people replace shame and guilt with curiosity and creativity.

The 16-step model holds that understanding internalized oppression and depression associated with racism, sexism, classism, and homophobia can be an important element for sustaining sobriety and feeling empowered. This workshop will include numerous strategies for recognizing and casting out the voices of the internal critics, saboteurs, and censors that lead to fear and inaction.

The workshop will be lively, uplifting, and will include lecture, dialogue, and experiential segments. Dr. Kasl's 16-Steps are for anyone wanting to become more confident, self-aware, able to assert themselves, and have a quieter mind. There are no "outside issues" in this model because all aspects of one's life are seen as interrelated.

Dr. Charlotte Kasl has been is a psychotherapist and workshop leader for over 30 years and is a Certified Addiction Specialist. She is author of *Many Roads, One Journey: Moving Beyond the 12-Steps; Women, Sex, and Addiction: A Search for Love and Power; Finding Joy*; often used as a daily meditation book in recovery/discovery groups; and six other books, including the highly popular series: *If the Buddha Dated/Married/Got Stuck*. She has presented workshops and keynote talks internationally and at her core, she's a peace and social justice activist who believes the starting place for healing the planet is in our heart. She believes deeply in the power of the human spirit to heal, particularly when we create supportive communities. Personal growth and healing involve a holistic process that includes insight, bonding, awareness, discipline, learning new skills, and spiritual growth.

SCHEDULE:

- 7:30 am Registration & Coffee (Exhibits Open)
- 8:30 am Welcome & Introduction
Otto Lim, Conference Chair
 Opening Prayer by Chief Ian Campbell
Hereditary Chief, Elected Councillor; Negotiator, Cultural Ambassador of Squamish Nation, Vancouver, BC
- 9:00 am Morning Workshop
** Note: A DVD of women telling their stories of healing and discovery will be shown in 3 segments throughout the day.*
 The trauma, the response, or..If I can't get love, I'll take drugs, sex, chaos, or romance: Dissociation, affect dysregulation, compulsions, and addictions as natural responses to trauma and lack of secure attachments.
 The 16-steps and core healing: Explore how the markers for overcoming trauma and addiction are addressed in the 16-Step Empowerment Approach.
 The fundamentals of empowerment and how they help reduce depression and anxiety: Step one: "We affirm we have the power to take charge of our lives"
- 10:30 am Coffee Break & Exhibits Open

- 10:45 am Morning Workshop Continued
- 12:00 pm Lunch (provided) & Exhibits Open
- 1:30 pm Afternoon Workshop:
 Questioning the Mind and the Voices that dance in your Head?
 Learn to understand internalized oppression/ depression and how to cast out the internal critics, censors, and saboteurs in order to take action and find your authentic voice.
 A Journey Through the Steps: Experience how gratitude, love, truth, taking action, responsibility, self-confidence, feeling joy, and good boundaries are embedded in the steps.
 Finding Joy: Some quick tips for preventing burn out and enjoying life, no matter what.
- 2:45 pm Coffee & Exhibits Open
- 3:00 pm Afternoon Workshop Continued and Q&A
- 5:00 pm Adjourn

Untangling the Web: Cyber Space and Concurrent Disorders

Bruce Ballon

B.Sc., M.D., E.S.P. (C), FRCP(C)

"The more things change the more things stay the same" is a quote that never seems to go out of style. With the advent of the internet, videogames, and other technological and multimedia cultural advances, is this quote true today? Dr. Ballon will explore this question by taking participants on a tour of the wired world and media influences that surround and bombard us. The internet is a part of our world. Many use it for school projects, checking work-mail, maintaining relationships with distant friends, and playing games. Blackberrys, iPhones, Xboxes and more, are all portals to the World Wide Web and it's a centrepiece of their social network, entertainment, and contact with the outside world. Partake in reflections and exercises to demonstrate that the 21st century technological wave has not only influenced youth but also all ages in our society. From a holistic perspective, Dr. Ballon will describe many of these influences and how they shape the presentations of addictive and mental disorders to appear novel and yet the essence of the conditions remain the same. An approach for understanding when there is a problem or not, is important, considering "normal" is a fluid concept in a fast-paced world.

Dr. Ballon will also highlight the importance of realizing that individuals can have many reasons for developing difficulties with the internet. Often, internet and gaming problem behaviours arise out of a failure to find a coping strategy for underlying mental health problems, including: Asperger's Syndrome (often being driven to know everything about a topic by constantly researching it); Pathological Gambling (stuck on the casino sites), Social Anxiety Disorder (Chats, role-play gaming worlds); Post Traumatic Stress Disorder (in chats, seeking others that may re-enact trauma situations); Obsessive Compulsive Disorder (obsessed with a topic, a game, or something that keeps them tied to the internet); Substance Use Disorders (ordering drugs and prescription medication via e-mails, researching ways to use drugs); Sexual "Addiction" (seeking and downloading pornography); Self-Mutilation Disorders (chat rooms where youth share their suicidal and self-harm techniques), as well as youth going through significant tumultuous events in their lives such as loneliness, being bullied, or parental divorce. In short, the

technology is not the sole issue - it's really how internet use and online habits interact with a person's unique makeup that determine if there are the seeds of a problem.

In his workshop, Dr. Ballon will: i) examine the impact, content, and context of technology in terms of pervasiveness in our culture; ii) reflect on the concept of "process addictions" in terms of creating a practical approach to screening and assessing important factors that influence the treatment of concurrent disorders; iii) create a strategy and approach to intervening and treating concurrent disorders that involve overuse of gambling, gaming, internet, and other updated and new 21st century activities.

Dr. Ballon will describe multimodal approaches to novel screening, assessing, and treating individuals with concurrent disorders that include process addictions (gambling, gaming, internet use, etc.) from clinical experience and evidence-informed practices. The good news is that although many things do appear different because of the surface manifestations of an individual's condition, the approach and treatment principles do remain the same!

Dr. Bruce Ballon is a psychiatrist and an Assistant Professor for the University of Toronto's Faculty of Medicine. Dr. Ballon is also the section Chair of Innovation in Teaching Methods for the Association of Academic Psychiatry. Dr. Ballon is the Director of the Psychiatry Simulation Innovation (P.S.I.) Centre for the University of Toronto based at the Mount Sinai Hospital. He is also the Head and developer of the new initiative Adolescent Clinical and Educational Services (ACES) for Problem Gambling, Gaming and Internet Addiction at the Centre for Addiction and Mental Health (CAMH). Dr. Ballon is also currently an Education Scholar in the Addiction Program as well as the consultant psychiatrist for the Youth Addiction Services and the Problem Gambling Services at the Centre for CAMH. Dr. Ballon also consults widely on medical education topics as an Academic Educator for the Centre for Faculty Development at the University of Toronto. Dr. Ballon has received numerous awards and peer-reviewed grants for his work in addiction psychiatry, psychotherapy, education, the humanities, and his writing. His training includes a B.Sc. in Genetics, his M.D., a Psychiatry Specialist degree and two fellowships: Child and Adolescent Psychiatry and Addiction Psychiatry. He has also received an Education Scholars Program certification. Dr. Ballon is a sought-after speaker for national and international meetings. He has special interest in different forms of media and their relationship with addiction and mental health issues. Dr. Ballon is considered an expert in the area of interactive techniques for medical education. He has designed a variety of novel psychoeducational and therapy initiatives involving the use of film, television, the internet, creative writing, theatre, magic, mentalism, and art.

SCHEDULE:

8:00 am Registration & Coffee (Exhibits Open)

9:00 am Morning Workshop:

Overview of our 21st century society and its activities and potential problems and the connection to mental health and addiction.

10:30 am Coffee & Exhibits Open

10:45 am Morning Workshop Continued

12:00 pm Lunch (provided) & Exhibits Open

1:30 pm Afternoon Workshop:

Clinical focus with identifying issues, concurrent disorder assessment and treatment principles and practical strategies.

2:45 pm Coffee Break & Exhibits Open

3:00 pm Afternoon Workshop Continued and Q&A

5:00 pm Adjourn

8:00 am Registration & Coffee (Exhibits Open)

8:30 am Concurrent Session A (Two 90-minute sessions and Three 3-hour sessions)

A1 Drug Treatments: A Clinical Perspective (90 Minutes)
Annabel Mead, MBBS, SChAM, Burnaby Centre for Mental Health & Addictions

This workshop aims to explore the medical management of common conditions in clients with substance dependence and comorbidities. The practical application of currently available pharmacotherapies, including new treatments for smoking cessation, alcohol and opiate dependence will be discussed.

A2 Treating Eating Disorders and Substance Abuse (90 Minutes)
Colleen Hyland, MA, RCC, Case Manager, Community Outreach Partnership Program, Vancouver Coastal Health Authority, Vancouver, BC
Ted Slater, Registered Nurse, Nurse Educator, Providence Health Care Eating Disorders Program, Vancouver, BC
Kim Williams, BSc, Registered Dietitian, Co-Coordinator, Community Outreach Partnership Program, Eating Disorders Program, St. Paul's Hospital, Vancouver, BC

This workshop will briefly highlight the literature on eating disorders and substance use as well as recently completed research from St. Paul's Hospital Eating Disorders Program (SPH EDP.) The majority of the workshop will focus on tool and techniques for the assessment and treatment of eating disorders and substance use. Case studies and practical examples will be used to highlight the various treatment issues.

A3 Sexual Addictions & Concurrent Disorders (3 Hours)
Paulette Tomasson

This presentation will cover the comorbidity of sexual addictions and concurrent disorders including the history of sex addiction and its treatment, its definition, the ten distinguishing types and their arousal templates, the usual presenting signs and symptoms, contributing factors and components, co-morbidity, as well as sex addiction and youth. Participants will come away with a beginning working understanding of sex addiction and its complexity. They will also have an assessment tool to aid in the screening for sex addiction as well as knowledge of resources in the community.

A4 The Globalization of Addiction and The Real World of Addiction Counselling (3 Hours)
Bruce Alexander, Professor Emeritus, Simon Fraser University, Vancouver, BC

During the last half of the 20th century, society viewed drug addiction as an individual disorder that could be successfully handled by addiction counsellors just as appendicitis and pneumonia are handled by medical doctors. Unfortunately, the addiction problem turned out to be more complex. Counselling sometimes succeeds, but more frequently it doesn't. No matter how successful counsellors are with some of their clients, the problem of addiction continues to increase and flood into new corners of the globe.

Moreover, addiction has proven to be far from an isolated disorder. Other complex life issues are intertwined with peoples' addictions and clients often have a variety of psychiatric diagnoses. Addiction is not limited to drugs and alcohol by any means. Addictions that do not involve drugs are more common and often just as harmful as those that do. More and more workers in the addiction field are seeing that these complexities arise because addiction is not so much an individual problem as a societal problem. Bringing the current worldwide flood of addiction under control will ultimately require transforming global society in a way that allows human beings to sustain themselves psychologically without feeling the need for addictive crutches.

This workshop is about the insights into counselling practice that arise from looking at addiction from a societal perspective. Dr. Alexander will re-examine some recent data on relatively successful treatment methods, discuss some insights that practicing counsellors have derived from a societal perspective, and ask the participants, working as a group, to help think of additional practical insights.

A5 Effective Self Management of Chronic Pain (3 Hours)
Neil Pearson, MSc, PScPT, Director Life is Now Corporation, Penticton; Clinical Faculty, Physical Therapy, UBC; Chair, Pain Science Division of CPA; Yoga Therapist, Penticton, BC

Modern science clearly supports updating our view of chronic pain. Optimism and a focus on active self-management are warranted. The strong link between chronic pain and depression adds obstacles to improvement of either. This presentation provides basics of modern pain science and evidence-based pain management strategies shown effective in people with concurrent chronic pain and depression.

10:00 am Refreshment Break & Exhibits

10:30 am Concurrent Session B (Two 90-minute sessions or CONTINUATION of A3, A4, or A5)

B1 Marijuana and Mental Health (90 Minutes)

Bayla Schecter, MD, AAFP, Regional Medical Advisor, Mental Health and Addictions, Vancouver Island Health Authority, Victoria, BC.

Many mental health clients with concurrent disorders do not understand the negative impact of marijuana on their mental health or that marijuana is an addictive substance. This case-based workshop provides detailed information about the effects of cannabinoids on the brain, including current research on how cannabinoids may adversely affect normal brain functions.

B2 The Power of Peer - Creating Our Own Recovery (90 Minutes)

A panel of peers involved in the self-help community (e.g. 12-step groups, therapeutic community, etc.) will share their experiences and discuss the strengths and challenges of recovery and peer-to-peer support. There will be time available for discussion and questions.

12:00 pm Lunch (Provided)

1:00 pm Concurrent Session C (Two 90-minute sessions and Two 3-Hour Sessions)

C1 Drug Treatments: A Clinical Perspective (90 Minutes) *(Repeated)*

Annabel Mead

Please see A1 for the session description.

C2 Treating Eating Disorders and Substance Abuse (90 Minutes) *(Repeated)*

Colleen Hyland, Ted Slater, Kim Williams

Please see A2 for the session description.

C3 Sexual Addictions & Concurrent Disorders (3 Hours) *(Repeated)*

Paulette Tomasson

Please see A3 for the session description.

C4 The Globalization of Addiction and The Real World of Addiction Counselling (3 Hours) *(Repeated)*

Bruce Alexander

Please see A4 for the session description.

2:30 pm Refreshment Break & Exhibits

2:45 pm Concurrent Session D (Two 90-minute sessions or CONTINUATION of C3 or C4)

D1 Marijuana and Mental Health (90 Minutes) *(Repeated)*

Bayla Schecter

Please see B1 for the session description.

D2 The Power of Peer - Creating Our Own Recovery (90 Minutes) *(Repeated)*

Please see B2 for the session description.

4:15 pm Closing Keynote: "Developing A Therapeutic Community"

Scot Durward, Program Director, Trapping Creek Ranch Therapeutic Community, Hixon, BC

Scot will share his personal story about his experiences with a concurrent disorder and his transformative journey from being a client to leading a therapeutic community. He has maintained his remarkable recovery through developing support from 12-step groups, the Centre for Concurrent Disorders, and other resources and will share his insights and perspectives. His story will inspire people and highlight what are important considerations in working with individuals with concurrent disorders.
